

যন্ত্রাংশের মানমাত্রা

সৌর যন্ত্রাংশ সমূহের মানমাত্রার তালিকা

SL	Product Name	Name Of Standards
1.	Solar Module/Panel	BDS IEC 61215-1:2019 Terrestrial photovoltaic (PV) modules – Design qualification and type approval – Part 1: Test requirements
		BDS IEC 61215-1-1:2019 Terrestrial photovoltaic (PV) modules – Design qualification and type approval – Part 1-1: Special requirements for testing of crystalline silicon photovoltaic (PV) modules
		BDS IEC 61215-1-2:2019 Terrestrial photovoltaic (PV) modules – Design qualification and type approval – Part 1-2: Special requirements for testing of thin-film Cadmium Telluride (CdTe) based photovoltaic (PV) modules
		BDS IEC 61215-1-3:2019 Terrestrial photovoltaic (PV) modules – Design qualification and type approval – Part 1-3: Special requirements for testing of thin-film amorphous silicon based photovoltaic (PV) modules
		BDS IEC 61215-1-4:2019 Terrestrial photovoltaic (PV) modules – Design qualification and type approval – Part 1-4: Special requirements for testing of thin-film Cu (In,Ga)(S,Se)2 based photovoltaic (PV) modules
		BDS IEC 61215-2:2019 Terrestrial photovoltaic (PV) modules – Design qualification and type approval – Part 2: Test procedures
		BDS IEC 61730 (Part 1):2019

		Photovoltaic (PV) module safety qualification – Part 1: Requirements for construction
		BDS IEC 61730 (Part 2):2019 Photovoltaic (PV) module safety qualification – Part 2: Requirements for testing
		BDS IEC 60891:2020 Procedures for temperature and irradiance corrections to measured I-V characteristics of crystalline silicon photovoltaic devices
		BDS IEC 60904 (Part 1):2013 (Under review) Photovoltaic devices – Part 1: Measurement of photovoltaic current-voltage characteristics.
		BDS IEC 61701:2020 Salt mist corrosion testing of photovoltaic (PV) modules
		BDS IEC 61853 (Part 1):2020 Photovoltaic (PV) module performance testing and energy rating – Part 1: Irradiance and temperature performance measurements and power rating
		BDS IEC 61853 (Part 2):2020 Photovoltaic (PV) module performance testing and energy rating – Part 2: Spectral responsivity, incidence angle and module operating temperature measurements
		BDS IEC 61853 (Part 3):2020 Photovoltaic (PV) module performance testing and energy rating – Part 3: Energy rating of PV modules
		BDS IEC 61853 (Part 4):2020 Photovoltaic (PV) module performance testing and energy rating – Part 4: Standard reference climatic profiles
		BDS IEC 62108:2020 Concentrator photovoltaic (CPV) modules and assemblies – Design qualification and type approval
		BDS IEC TS 62804 (Part 1):2020 Photovoltaic (PV) modules – Test methods for the detection of potential-induced degradation – Part 1: Crystalline silicon

2.	Inverter	BDS IEC 62109 (Part 1):2016 Safety of power converters for use in photovoltaic power systems Part 1: General requirements
		BDS IEC 62109 (Part 2):2016 Safety of power converters for use in photovoltaic power systems Part 2: Particular requirements for inverters
		BDS IEC 62109 (Part 3):2020 Safety of power converters for use in photovoltaic power systems – Part 3: Particular requirements for electronic devices in combination with photovoltaic elements
		BDS IEC 61727:2020 Photovoltaic (PV) systems – Characteristics of the utility interface
		BDS IEC 62116:2020 Utility-interconnected photovoltaic inverters – Test procedure of islanding prevention measures
		BDS IEC 61683:2020 Photovoltaic systems – Power conditioners – Procedure for measuring efficiency
3.	Solar Charge Controller	BDS IEC 62509:2016 Battery charge controllers for photovoltaic systems – Performance and functioning
4.	Battery	BDS IEC 61427-1:2016 Secondary cells and batteries for renewable energy storage - General requirements and methods of test - Part 1: Photovoltaic off-grid application
		BDS IEC 60086-4:2005 Primary batteries - Part 4: Safety of lithium batteries
5.	Others	BDS IEC 61724 (Part 1):2020 Photovoltaic system performance – Part 1: Monitoring
		BDS IEC TS 61724 (Part 2):2020 Photovoltaic system performance – Part 2: Capacity evaluation method
		BDS IEC TS 61724 (Part 3):2020 Photovoltaic system performance – Part 3: Energy evaluation method
		BDS ISO 9488:2011 Solar energy – Vocabulary.

		BDS IEC 60904-1:2013 Photovoltaic devices - Part 1: Measurement of photovoltaic current-voltage characteristics
		BDS IEC 60904 (Part 2):2020 Photovoltaic devices – Part 2: Requirements for reference solar devices.
		BDS IEC 60904 (Part 3):2020 Photovoltaic devices – Part 3: Measurement principles for terrestrial photovoltaic (PV) solar devices with reference spectral irradiance data.
		BDS IEC 60904 (Part 9):2013 (Under review) Photovoltaic devices – Part 9: Solar simulator performance requirements
		BDS IEC 60904 (Part 10):2014 (Under review) Photovoltaic devices – Part 10: Methods of linearity measurement
		BDS IEC 61829:2020 Photovoltaic (PV) array – On-site measurement of current-voltage characteristics
		BDS IEC/TS 61836: 2020 Solar photovoltaic energy systems – Terms, definitions and symbols.
		BDS IEC 62093:2020 Balance-of-system components for photovoltaic systems – Design qualification natural environments
		BDS IEC 62253:2020 Photovoltaic pumping systems – Design qualification and performance measurements
		BDS IEC 62548:2020 Photovoltaic (PV) arrays – Design requirements
		BDS IEC TS 62738:2020 IEC TS 62738 Ground-mounted photovoltaic power plants – Design guidelines and recommend

The standards can be sourced from **http://bstibds.com/ online store of BSTI.
https://sreda.gov.bd/pages/static-pages/6922e142933eb65569e2b2d6

To qualify for customs duty exemptions under SRO 159 / SRO 241, your components must simultaneously fulfill SREDA Technical Standards and exactly align with the 8-digit Bangladesh Customs Tariff (HS Code) schedule. [1]

1. SREDA Technical & IEC Standards Compliance

The Sustainable and Renewable Energy Development Authority (SREDA) mandates international certification (primarily IEC adopted as BDS IEC by BSTI). When submitting datasheets and lab test reports to SREDA, your supplier documents must show the following certifications:

- **Solar PV Modules / Panels:**
  - **BDS IEC 61215 (Parts 1 & 2):** Design qualification and type approval for terrestrial crystalline silicon / thin-film PV modules.
  - **BDS IEC 61730 (Parts 1 & 2):** PV module safety qualification covering construction and mechanical/electrical testing.
  - **IEC 61701:** Salt mist corrosion testing (mandatory for coastal or harsh atmospheric environments).
  - **IEC TS 62804:** Detection of Potential-Induced Degradation (PID). [1]
- **Solar Inverters (On-Grid / Hybrid / Central):**
  - **BDS IEC 62109-1 & IEC 62109-2:** Safety of power converters used in photovoltaic systems (general and particular requirements for inverters).
  - **BDS IEC 61727 / IEC 62116:** Characteristics of utility interface and anti-islanding protection compliance.
  - **IEC 61000 series:** Electromagnetic Compatibility (EMC) compliance. [1]
- **Lithium-Ion Battery Storage (BESS):**
  - **IEC 62619:** Safety requirements for secondary lithium cells and batteries for industrial applications.
  - **IEC 62485-2 / UN 38.3:** Safety requirements for secondary batteries/installations and transport clearance.
- **Solar DC Cables & Connectors:**
  - **IEC 62930 / EN 50618:** Electric cables for photovoltaic systems (halogen-free, UV-resistant, flame-retardant cross-linked insulation rated for DC 1.5 kV).

2. HS Code Alignment Schedule

To ensure zero-duty clearance in the ASYCUDA World system, verify your shipping documents reflect the exact 8-digit HS classification defined in SRO 159 and subsequent amendments:

Component Description	Standard 8-Digit HS Code	Statutory Relief Status
Solar PV Modules / Panels	**8541.43.00**	CD: 0%, RD: 0%, SD: 0%
Solar Inverters	**8504.40.90** *(corrected from 8504.40.40)*	CD: 0%, RD: 0%, SD: 0%
Lithium-Ion Accumulators / Cells	**8507.60.00**	CD: 0%, RD: 0%, SD: 0%
BMS (Battery Management Systems)	**8537.10.99 / 9032.89.00**	Covered under project BESS schedule
Solar Mounting Structures (Aluminum)	**7610.90.00**	CD: 0% (Subject to end-use verification)
Solar Mounting Structures (Steel)	**7308.90.90**	CD: 0% (Subject to end-use verification)
Solar DC Cables (UV-protected)	**8544.49.00 / 8544.60.00**	Duty-free under SREDA clean energy quota

3. Practical Clearance Alignment Checklist

- **Description Wording:** The product description on the Commercial Invoice, Packing List, and Bill of Lading must explicitly specify renewable energy utility (e.g., state *"Solar Photovoltaic Inverter"* or *"Solar PV Module"* rather than generic terms like *"Static Converter"* or *"Electrical Module"*).
- **Test Lab Accreditation:** SREDA requires module and inverter test reports from internationally recognized labs (e.g., TÜV Rheinland, TÜV SÜD, UL, or Intertek) or local testing bodies like BSTI/BUET.[1]
- **SREDA Recommendation Code:** Ensure your C&F agent enters the SREDA NOC approval number into Box 44 of the customs bill of entry before assessment.

SREDA Import Recommendation Application Process

To claim these tax exemptions at the port, you must acquire an official recommendation or No-Objection Certificate (NOC) through the **Sustainable and Renewable Energy Development Authority (SREDA)** online portal.

Step 1: Portal Registration & Profile Creation

1. Access the official SREDA Solar Portal.
2. Register an enterprise profile using your **Trade License**, **IRC (Import Registration Certificate)**, and **BIN (Business Identification Number)**.

Step 2: Document Compilation

Prepare digital copies of the following mandatory import papers:

- **Proforma Invoice (PI)** or **Commercial Invoice (CI)**
- **Bill of Lading (B/L)** or **Airway Bill**
- **Packing List** highlighting the exact **HS Codes** matching SRO 241/159
- **Technical Specifications Sheet** (Datasheet demonstrating international standards like IEC/UL for solar modules or inverters)
- **End-Use Undertaking:** A signed declaration on non-judicial stamp paper stating that the equipment is strictly for renewable power generation and will not be commercialized for other uses.

Step 3: Online Submission

1. Navigate to the **"Import Recommendation" / "NOC Request"** tab in the dashboard.
2. Fill out the digital form with total quantities, values, and matching HS codes.
3. Upload your compiled documents and submit the application for technical evaluation.

Step 4: Verification & Issuance

- SREDA's technical committee reviews the capacity limits, specifications, and project alignment (typically within 7–10 working days).
- Once approved, a digitally signed **SREDA Recommendation Letter** is generated. Your clearing agent can then input this letter code into the NBR ASYCUDA World system to instantly unlock the 0% customs duty assessment.

complete blueprint for customs clearance under **SRO 159 & SRO 241**. It includes your SREDA submission checklist and a copy-pasteable legal draft for your End-Use Undertaking.

Part 1: SREDA Endorsement Submission Checklist

To ensure your application moves smoothly through the SREDA technical committee, organize your portal upload into these three structural buckets:

1. Statutory & Corporate Credentials

- **Valid Trade License** (Reflecting renewable energy, export/import, or engineering operations).
- **Import Registration Certificate (IRC)** copy.
- **Business Identification Number (BIN)** 13-digit registration certificate.
- **ArielMC Enterprise System Profile Data** matching the importer name exactly across all documents.

2. Commercial Shipments & Procurement Records

- **Proforma Invoice (PI) / Commercial Invoice (CI):** Product descriptions must explicitly state *"Solar Photovoltaic Modules"*, *"Solar Inverters"*, or *"Lithium-Ion BESS Cell/Accumulator"*.
- **HS Code Alignment Verification:** Ensure the codes match the SRO 241 schedule exactly:
    - Solar Modules: **8541.43.00**
    - Solar Inverters: **8504.40.90** *(Do not use the obsolete 8504.40.40 code)*
    - Lithium Batteries: **8507.60.00**
- **Bill of Lading (B/L) / Airway Bill** and **Packing List**.

3. Technical Compliance & SRO Mapping

- **Manufacturer Technical Datasheet:** Highlighting operational specifications, capacities, and efficiency parameters.

- **IEC Test Certificates & Lab Reports** (From accredited third-party labs like TÜV, UL, or Intertek):
    - **Modules:** BDS IEC 61215 / 61730
    - **Inverters:** BDS IEC 62109-1 / -2 and anti-islanding IEC 62116
    - **Lithium Cells:** IEC 62619
- **Signed End-Use Undertaking** (Scanned copy of the legal draft below).

Part 2: End-Use Undertaking Draft Text

(To be printed on your company letterhead or non-judicial stamp paper of BDT 300 value, as dictated by your custom house).

Date: [Insert Date]

To,
The Commissioner of Customs,
Custom House, [Insert Port of Importation, e.g., Chattogram / Dhaka / Kamalapur ICD]
Bangladesh.

Subject: Undertaking for Duty-Free Clearance of Solar Energy Equipment under SRO No. 159-Law/2026/14/Customs read with Amending SRO No. 241-Ain/2026/71/Customs.

Dear Sir,

We, **[Insert Your Company Name / Ariel Entity Name]**, having our registered commercial office at **[Insert Registered Corporate Address]**, holding BIN: **[Insert 13-Digit BIN]** and IRC No: **[Insert IRC Number]**, do hereby solemnly declare, undertake, and affirm as follows:

1. That we are the legal importer of record for the consignment consisting of **[Insert Product Description, e.g., Solar Photovoltaic Modules / Solar Photovoltaic Inverters]**, arriving via vessel/flight **[Insert Vessel Name / Flight No]** under Bill of Lading / Airway Bill No: **[Insert B/L or AWB Number]**, Dated: **[Insert B/L Date]**, and Invoice No: **[Insert Commercial Invoice Number]**, Dated: **[Insert Invoice Date]**.

2. That the imported goods exactly align with the statutory definitions, descriptions, and 8-digit Bangladesh Customs Tariff (H.S. Codes) scheduled under **SRO No. 159-Law/2026/14/Customs** and its subsequent amendment **SRO No. 241-Ain/2026/71/Customs** namely H.S. Code [**Insert exact 8-digit HS Code, e.g., 8541.43.00 / 8504.40.90**].
3. We strictly undertake that these imported components are **entirely dedicated to renewable solar energy production, power plant installation, or net-metering clean energy projects** within the territory of Bangladesh.
4. We explicitly declare that these components **will not be sold, transferred, altered, or diverted** for use in any commercial consumer electronics, vehicular propulsion, fossil-fuel power grids, or any other alternative application outside the scope of the clean energy fiscal perks granted by the National Board of Revenue (NBR).
5. If at any post-clearance stage or audit, it is discovered or proven that the imported items were diverted, sold in the open local marketplace, or utilized for non-solar purposes, we shall be held fully liable to pay the standard Total Tax Incidence (TTI), along with applicable fines, interests, and penalties under the Customs Act and regular corporate laws of Bangladesh.

We certify that the statements made above are true, accurate, and legally binding.

Sincerely,

[Authorized Signature]
