SUBJECT: OFFICIAL COMMERCIAL & TECHNICAL SUBMISSION FOR TURNKEY ROOFTOP SOLAR EPC INSTALLATION & SREDA NET-METERING INTEGRATION

Dear Sir/Madam,

On behalf of Ariel Renewable Energy Limited, an enterprise entity of the ArielMC Eco-System, we are privileged to formally present this official corporate communication regarding the turnkey engineering, procurement, construction (EPC), and grid-interconnection of export-grade commercial and industrial rooftop solar PV assets.

As national grid electricity tariffs reach historical highs (Tk 14.85+ per kWh for HT-3 industrial consumers) coupled with stringent RE100, CBAM, and international buyer ESG decarbonization mandates across Bangladesh's premier export sectors, on-site solar generation delivers immediate operational margin expansion and long-term energy autonomy.

Ariel Renewable Energy Limited delivers complete bankable turnkey engineering in strict conformance with BNBC 2020 structural wind codes (180 km/h), SREDA Net-Metering Guidelines 2018 (revised 2023), and Bangladesh Bank 4.5% Green Refinancing eligibility. Every project is backed by our signature 15-Year Water-Tight Roof Guarantee and 25-Year Performance Ratio SLA (PR ≥ 80%).

[OFFICIAL ATTACHMENT NOTICE]
This official letterhead is accompanied by our bespoke 1-Page Commercial Quotation, detailed 14-page Technical Dossier (Ref: AREL-EPC-2026-BOARD-V1), 16:9 Executive Presentation Slide Deck, and certified structural feasibility study for your facility's immediate boardroom appraisal.

Yours faithfully,
For Ariel Renewable Energy Limited

Syed Akramul Hassan
Managing Director & Chief Executive Officer
